

Scandia Food

Frozen

- F R O Z E N P R O D U C T S -

Scandia Food Frozen is meant to bring value in the ready to cook/ready to eat frozen products market, through a series of clear advantages communicated to the consumer.

IQF (individual quick freezing).

This process involves the individual quick freezing of each product, ensuring its superior quality after defrosting. This is due to the fact that through this process, the ice crystals that are formed are smaller, when compared to those formed through traditional freezing.

Products that are individually quick frozen allow for the maintaining of a product's quality contents and aspect which further allows consumers to defrost the product, preserving its freshness with no effects on taste, texture, aspect or benefits.

Through freezing, a product's preservation period increases 5-50 times, compared to refrigeration. The freezing process represents an eco friendly alternative.
